OSHA Training
Behavioral Training
Safety Systems Development

Why have our programs been so successful?

We take the time to understand your employees, their work environment and their personal values. A customized Safety Training program is then developed that is easy for both the team and the individual to relate to.

Our message is simple:

*YOU are responsible for your personal safety
YOU are relied upon for your team's safety*

The policies and procedures you take great care in implementing will be in vain if your team does not comply. Our training sessions will improve compliance and simultaneously increase morale, team strength and leadership.

Our common sense approach and proven effective behavioral techniques maximize team "buy-in".

Can you afford non-compliance?

- OSHA Training
- Behavioural Safety
- Safety Systems
- Safety Tools
- Industry Specific Training
- Customized Training

Not your average safety training course!

"This was the best safety program I have ever attended! It contained a lot of relevant information and your facilitator made it fun and interactive.

I enrolled my team in other programs and we were all very sceptical about attending another. After just 5 minutes into the course, we knew this one would be different. Hands down the most effective safety training session we have ever participated in.

Our safety record improved 60%, our quality is up and we have consistently exceeded all of our deadlines since the training. This course is a MUST for all General Contractors!

*Garry Chomas
President
Chomas Construction*

Zero injuries, zero accidents.
Is your team up for the challenge?

Our focus is personal safety ownership

Corporate Safety Goal

Zero accidents, zero injuries!

Team Safety Goal

No one on my team gets injured!

Personal Safety Goal

I don't get injured!
