*Delivering cost effective,  
quality results through  
Behavioral Safety Training*

*Training designed to make  
your workplace a healthier,  
happier and safer place.*

*Why have our programs been so successful?*

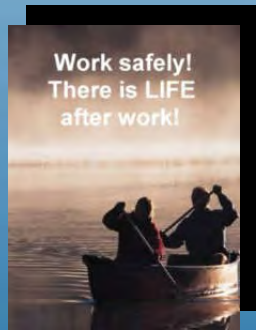

We take the time to understand your employees, their work environment and their personal values. A customized Safety Training program is then developed that is easy for both the team and the individual to relate to.

Our message is simple:

*YOU are responsible for your personal safety  
YOU are relied upon for your team's safety*

The policies and procedures you take great care in implementing could be in vain if your team does not comply. Our training sessions will improve compliance and simultaneously increase morale, team strength and leadership.

Our common sense approach and proven effective facilitation techniques maximize team "buy-in".

"We believe that all accidents can be avoided. Your goal should be to achieve a PERFECT safety record."

When we make this statement at the beginning of a safety class, the result is rarely positive. In fact, most participants openly object. This is exactly the response we expect.

By the end of our safety program, we ask the question again. Unanimously the response shifts. Participants have started to **believe** that collectively, we **can** achieve zero accidents in our workplace and what needs to be done to get there.

*Not your average safety training course!*

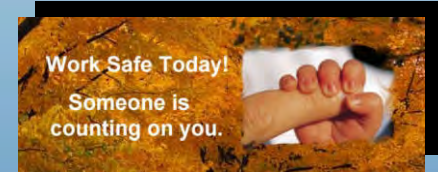

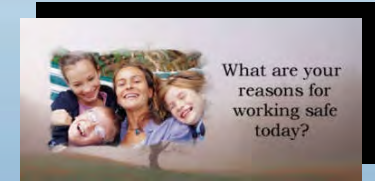

*"This was the best safety program I have ever attended! It contained a lot of relevant information and your facilitator made it fun and interactive.*

*I enrolled my team in other programs and we were all very skeptical about attending another. After just 5 minutes into the course, we knew this one would be different. Hands down the most effective safety training session we have ever participated in.*

*Our safety record improved 60%, our quality is up and we have consistently exceeded all of our deadlines since the training. This course is a MUST for anyone wanting to improve their safety record and increase compliance!*

*Garry Chomas  
President  
Chomas Construction*

*Zero injuries, zero accidents.  
Is your team up for the challenge?*

*Our focus is personal safety ownership*

*Corporate Safety Goal*

*Zero accidents, zero injuries!*

*Team Safety Goal*

*No one on my team gets injured!*

*Personal Safety Goal*

*I don't get injured!*
